

Draw Coven
Lead a team of evil forces and use their strong magical abilities to control the state of the game.

Hive Swarm
Join the swarm of giant mutated insects using your terrifying bioweapons to tear apart your opponents.

In the far future the world is in ruin and powerful races are fighting to control Terra and it is your job to ensure your chosen race is victorious.

Select one of 6 powerful races to fight over key locations on Terra. Your army will compose of multiple units of your choosing from a large pool of unique options. Over the course of 5 rounds each player will take turns mobilizing their forces to control key points on the map, complete objectives and eliminate the enemy. The player with the most points at the end of the game wins.

Turn based tactical gameplay
Futuristic apocalyptic wargame aesthetics
Implementation of both PvP and PvE game modes
Choose from 6 different races all with unique unit selections
A range of powerful weapons from power swords to rail guns
Tabletop gameplay in a videogame setting using dice randomisation for attacks and additional mechanics.

Legions Imperius
Fight as genetically optimised humans in power armour. Use your range of specialists to control the battlefield.

Skeletonian Empire
Play as a horde of reanimating robot skeletons to flood the battlefield in units.

Forgotten Hordes
Control extremely durable plagued monsters to reduce all incoming damage and outlast your opponent.

Mechanised Commonwealth
Cover all firing lanes with your ranged superiority armed on powerful Mech suits.

 - Fast

- Recon Team
 - 10 models
 - Weak weapons
 - Low cost
 - Light infantry armour
 - Can be placed further up the board pre-game
 - Can spot for other units against enemy targets to give them a damage buff

Forgotten Hordes:

- Monster Swarm

- Great Unclean One

- Beast of nugle

Gameplay:

Select which units to take to battle out of your selected number of credits, each will have their own cost, durability, movement, damage output and abilities

Enemy will also select their units

Deployment – both players take turns placing units within their home base zone (except for scouts and recon team which can forward deploy) until all units are placed.

Randomise who goes first

Take turns doing a number of actions with each unit (action points?) all units on your army do each stage before any progress to the next stage:

Score – score points for each primary objective that you control at the start of your turn

Move - move up to the movement characteristic of the unit

Shoot – shoot all weapons that can see a visible enemy (that aren't in a defensive position like bunker down or overwatch in xcom2)

Charge – charge into enemy units to attack in melee combat

Melee – resolve melee combat

Score – score points for completing secondary objectives

End of players turn

End of game whoever has the most points wins the game
